PORT BOSKAMP HOSPITAL SURINAME & SURGERY CENTRE

Compassionate Care • Advanced Medicine • Better Outcomes

Port Boskamp Hospital Suriname & Surgery Centre is envisioned as a modern, full-service medical campus designed to provide advanced healthcare for the growing Port Boskamp community and the wider region of Suriname. Based on the concept image, the hospital is planned around a 250-bed capacity with a dedicated surgery centre, 24/7 emergency and trauma care, fully equipped intensive-care services, modern labor and delivery suites, diagnostic imaging, pharmacy and laboratory services, rehabilitation and physiotherapy, and a rooftop helipad for urgent medical access. The facility is also presented with approximately ten modern operating theatres and a broad range of specialties, including general surgery, cardiology, orthopedics, neurosurgery, pediatrics, obstetrics and gynecology, ENT, ophthalmology, urology, internal medicine, oncology, dental care, plastic surgery, anesthesiology, and radiology.

The hospital concept emphasizes a combination of advanced medical technology, resilient infrastructure, and patient-centered care. The image highlights digital CT, MRI, X-ray and ultrasound systems, advanced patient monitoring, modern ventilators, robotic and minimally invasive surgery equipment, electronic medical records, telemedicine capability, infection-control systems, and reliable 24/7 power, water, and oxygen supply. Supporting features such as solar power and backup energy, high-speed communications, security and CCTV, sustainable site planning, wide road access, comfortable patient rooms, and a skilled medical workforce are intended to make the facility dependable and accessible in both everyday and emergency conditions. Together, these elements position Port Boskamp Hospital Suriname & Surgery Centre as a proposed regional healthcare hub focused on safety, medical excellence, technology, dignity, and long-term community health.
