PBK Mini-bus Service

The PBK Mini-bus is a fully electric, fully air-conditioned transport service designed to serve Port Boskamp along all major roads, providing safe, reliable, and comfortable travel for staff and visitors. Operated by trained, safety-conscious drivers, the mini-bus helps move passengers efficiently between key locations, including the Harbour, Main Gate, and other important destinations throughout the port area. With clean electric power, low noise, and modern onboard comfort, the PBK Mini-bus supports a more sustainable transportation network while ensuring a pleasant and dependable ride for everyone who uses it.

ELJA-ONE DC Fast Charging Station – Inside Overview

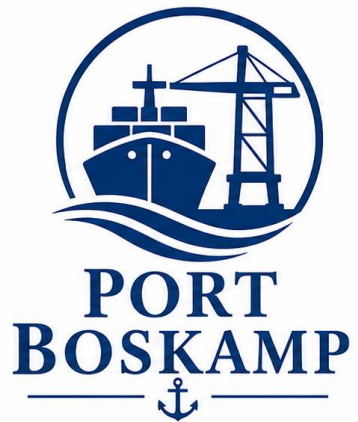

PBK Port Boskamp EV Charging Standardization

PBK Port Boskamp will standardize its electric mobility ecosystem by requiring all electric vehicles, including delivery vehicles, electric bikes, electric scooters, passenger cars and related fleet vehicles, to use a proprietary standardized connection that is fully integrated with the PBK electrical infrastructure system.

This unified charging platform will support a growing network of charging stations strategically located along key routes within Suriname, enabling licensed PBK vehicles to operate both inside and outside the PBK development and to access charging on public roads through participating partners using WEG Energy Alger 1 charge stations.

The system will provide multiple charging options ranging from slow charging to rapid charging, ensuring flexibility for personal, commercial and logistics use. Vehicles charging on PBK property will benefit from preferred pricing, reinforcing the value of the PBK network while supporting reliable, scalable and branded clean-transport infrastructure throughout the country.
