Port Boskamp Town Center

The **Port Boskamp Town Center** is envisioned as the vibrant commercial and social heart of the Port Boskamp development in Suriname—a welcoming, walkable destination where residents, employees, visitors, and international business travelers can come together. As illustrated in the concept image, the Town Center combines **restaurants, cafés, retail shops, markets, professional services, landscaped public spaces, fountains, pedestrian promenades, and outdoor gathering areas** within an attractive waterfront-inspired setting. The architecture is designed to create a distinctive destination with a relaxed tropical character while providing the modern amenities expected of a major mixed-use development. This Town Center complements Port Boskamp's broader vision of integrating commercial facilities, residential communities, industrial infrastructure, logistics, energy, and waterfront development into one connected destination.

More than simply a shopping area, the Town Center is intended to become a **central community gathering place and economic hub**, supporting local businesses, entrepreneurs, hospitality operators, restaurants, entertainment, and essential everyday services. Pedestrian-friendly streets, outdoor dining areas, landscaped plazas, and evening gathering spaces will help create activity throughout the day and into the evening, while convenient connections to the residential areas, harbor, marina, business facilities, and other parts of Port Boskamp will make the Town Center an important focal point for the entire development. The goal is to create **a place to gather, a place to belong, and a destination that contributes to the long-term growth of Port Boskamp and the surrounding Saramacca District**
